| | | | | | |
| Light snow showers | Sunny intervals | Light snow showers | Light snow showers (night) | Light snow showers (night) | Light snow |
| Precipitation probability | | | | | |
| 20% | 10% | 30% | 30% | 40% | 70% |

**Forecast for Tuesday 28 Nov 2023**

**Weather:** Rather cloudy at first with patchy rain and summit snow. Any early mist of freezing fog patches in valleys will slowly clear. Cloud thinning and breaking during the morning to give sunny spells. Increasing risk of wintry showers through the afternoon, although falling as rain to lower levels during daylight hours. Thickening cloud later in the evening may bring periods of light snowfall overnight.

**Chance of cloud-free hill tops above 800m:** 40% initially, improving from the east to 80% by mid-morning. Lowering from the northwest to 30% later.

**Low Cloud and visibility:** Extensive cloud at first with bases around 600m, this clearing away with bases then largely remaining above summits. Bases in wintry showers may briefly obscure tops above 500m, with cloud lowering from the northwest more solidly into the evening to give bases of 500-800m, lower in any wintry precipitation. Visibility mostly very good or excellent, although poor or very poor in snow or snow showers, and in patches of mist or freezing fog.

| **Freezing Level*** | 800m | 800m | 800m | 800m | 800m | 800m | 600m |

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

Temperatures close to or below freezing across higher routes with wind chill at times, especially in any blustery snow showers. Some isolated icy patches may form following any showers.

**Forecast for Wednesday 29 Nov 2023**

**Weather:** Cloudy at first with patchy light sleet and snow but rain lower down. This clearing to the south by dawn, becoming mostly dry and clear and allowing a frost to form. Dry and bright for much of the day with sunny spells, chance of a few isolated showers clipping the far northwest of the park. Clear skies in the evening with a widespread frost.

**Maximum wind:** Northeast 10-15 mph, gusting 20-25 mph at times.

**Chance of cloud-free hill tops above 800m:** 80% during daylight hours, 30% overnight.

**Low Cloud and visibility:** Extensive bases of 600m or lower overnight clearing to the south around dawn. No significant low cloud expected during daylight hours. Visibility very good or excellent, except in any early showers.

**Temperature:** **Valleys:** Zero Celsius around dawn, rising to Plus 4 Celsius around the middle of the day.
**At 800m:** Minus 2 Celsius to Minus 5 Celsius
**Freezing level:** Around 600-800m then falling to most levels by evening.
